As a student of the 4+1 Combined BAsC/MAsC program, I agree to:

- Enroll in ELEC 497 Research Project course (Summer or Fall-Winter terms). The course counts as a fourth year elective course towards my B.A.Sc. program. The project is supervised by the ECE Faculty member(s) who agrees to become my MAsC thesis supervisor after completion of my B.A.Sc. program with Advanced Standing;
- Enroll in two ECE graduate level courses* in my 4th year (as determined in consultation with my supervisor);
- Apply for admission to the MAsC Program through SGS (School of Graduate Studies) by January 31st (Winter term of 4th year);
- Continue my research studies full time under the direction of my supervisor in May after completion of my B.A.Sc. program with Advanced Standing. During the remaining 16 months as a MAsC student I will receive a financial support package that will provide a stipend of \$23,000 per year. From September through May, I will take 2 more graduate level courses (as determined in consultation with my supervisor).

* NOTE: Passing grade in graduate level courses is 70% / B- (no supplemental exams at the graduate level).
